Introduction

The PARRTS Data Dictionary supports the contingency plan for inputting data into the Patient Accounting and Reporting Realtime Tracking System (PARRTS). This manual provides a detailed description of the data elements in PARRTS. If PARRTS cannot be accessed or is not functioning, this manual (and the accompanying PARRTS datasheet) can be used to manually record patient data for PARRTS.

Summary of the PARRTS Data Elements

Operation/Event Data

Data Element	Type	Length	Description
Operation	char	255	The military mission or action.
Event	char	255	An event significant to the operation.
Facility (DMIS ID)	char	4	The DMIS ID of the admitting MTF

Patient Demographic Data

Data Element	Type	Length	Description
Social Security Number (SSN)	char	9	The Social Security Number (or pseudo SSN) of the patient's sponsor.
Family Member Prefix (FMP)	char	2	The Family Member Prefix identifies the relationship of the patient to the military sponsor.
Last Name	char	25	The patient's surname.
First Name	char	25	The patient's first name.
Date of Birth	datetime		The patient's date of birth.
Sex	char	1	The patient's gender.
Inpatient/Outpatient	bit	1	Identifies a patient as an inpatient or outpatient.

Administrative Data

Data Element	Type	Length	Description
Patient Category (Pat Cat)	char	3	Patient category
Pay Grade	char	2	The patient's current military pay grade.
VIP	bit	1	Identifies if the patient is considered a very important person or special interest person as defined by MEDCOM Regulation 40-7.
Seriously III/Very Seriously III (SI / VSI)	char	1	Indicates if the patient is Seriously III or Very Seriously III.

Data Element	Type	Length	Description
Enabling Care Head Trauma Burns Post Traumatic Stress Disorder Eye Trauma Spinal Cord Injury Amputee (Land Mine, Grenade, Gunshot Wound, Motor Vehicle Accident, Other)	binary		Options that describe the type of enabling care for the patient.
VIP Title	char	255	VIP title
POC Name/Phone	char	255	For VIPs, the name and telephone number of the patient's point of contact
Hosp. Register Number	char	7	The patient's hospital register number.
Admission/Treatment Date (Adm Date)	datetime		The month, day and year the patient is admitted to or treated at the MTF.
Admitting Diagnosis (Adm Diag)	char	255	The description of the patient's principal diagnosis at the time of admission. This can be free text or the ICD9 code/description.
Civilian Hospital Name	char	255	The name of the civilian hospital that a patient was admitted to for care.
Unit-Co	char	5	The name of the Company to which the patient is assigned.
Unit-Bn	char	7	The name of the Battalion to which the patient is assigned.
Unit-Bde	char	7	The name of the Brigade to which the patient is assigned.
Unit-Div	char	12	The name of the Division to which the patient is assigned.
Unit-Base	char	255	The name of the Base to which the patient is assigned.
Type Case	char	3	The patient's type case.
MOS	Char		The military occupation skill of patient.
Source of Admission	char	1	The patient's source of admission.
Injury Date	datetime		The month, day and year on which the patient's injury occurred.
Convalescence Leave Return Date	datetime		The date the patient is expected to return from convalescence leave (inpatient only).
Disposition Type (Disp Type)	char	2	A description of the disposition for the patient.
Disposition Date (Disp Date)	datetime		The disposition date for this patient.
MTF Transferred To (MTF Trf To)	char	4	The DMIS ID of the MTF to which the patient is transferred or moved.

Comments Data

Data Element	Type	Length	Description
Comment Date	datetime		Date on which the comments are entered.
Comments	char	255+	Brief summary of the patient's condition.

Detailed Description of the PARRTS Data Elements

Operation/Event Data

Data Element: Operation
Type: character
Length: 255

Definition: An operation is a military action or a strategic, tactical, service, training, or administrative military mission. For example, Allied Force, Noble Eagle, Enduring Freedom are examples of Operations. In PARRTS, all patient records are associated with a specific operation and event.

Data Element: Event
Type: character
Length: 255

Definition: Every operation has one or more events. When an operation is initiated, PASBA personnel will enter the operation name into the PARRTS and will also enter an event of the same name for the normal stream of patients. If there is a mass casualty, you'll need to create a new event for that operation. If you are using the datasheet, make a new copy of the datasheet for patients involved in the new event (the mass casualty). Continue to use the original datasheet for the normal stream of patients.

Data Element: Facility (DMIS ID)
Type: character
Length: 4

Definition: The DMIS ID of the medical treatment facility providing care for the patient. For a list of DMIS IDs, see page 19.

Patient Demographic Data

Data Element: Social Security Number (SSN)

Type: character

Length: 9

Definition: A unique number assigned to person by the United States Social Security Administration. The SSN collected by CHCS is that of the patient's sponsor.

The range is 001000001-809991231. This field should be completed using the person's identification card.

When an SSN is not available (e.g., civilian emergency, foreign military) a pseudo-SSN will be made up as follows:

First two positions:
the digits 80

The third position:
0-9 (to allow for multiple pseudo SSNs with the same birth date)

Fourth through ninth position:
Date of Birth in YYMMDD format
If the Date of Birth is unknown, use the admission date in the same format of
YYMMDD

Name: Family Member Prefix (FMP)

Type: character

Length: 2

Definition: A two-digit code used to describe the patient's relationship to their sponsor. Use the following values to identify the FMP for this patient:

01	1st child
02	2nd child
03	3rd child
04	4th child
05	5th child
06	6th child
07	7th child
08	8th child
09	9th child
10	10th child
11	11th child
12	12th child
13	13th child
14	14th child
15	15th child
16	16th child
17	17th child
18	18th child
19	19th child
20	Sponsor

30	Spouse of sponsor
31	Former spouse 1 of spon'r
32	Former spouse 2 of spon'r
33	Former spouse 3 of spon'r
34	Former spouse 4 of spon'r
35	Former spouse 5 of spon'r
36	Former spouse 6 of spon'r
37	Former spouse 7 of spon'r
38	Former spouse 8 of spon'r
39	Former spouse 9 of spon'r
40	Mother/stepmother-spon'r
45	Father/stepfather-sponsor
50	Mother-in-law of sponsor
55	Father-in-law of sponsor
60	Oth authorized dependents
61	Oth authorized dependents
62	Oth authorized dependents
63	Oth authorized dependents
64	Oth authorized dependents
65	Oth authorized dependents
66	Oth authorized dependents
67	Oth authorized dependents
68	Oth authorized dependents
69	Oth authorized dependents
90	Benefi authorized-statute
91	Benefi authorized-statute
92	Benefi authorized-statute
93	Benefi authorized-statute
94	Benefi authorized-statute
95	Benefi authorized-statute
98	Civilian emergencies
99	All others, NEC

NOTES:

Additional clarification for Patient Category/Family Member Prefix combinations:

According to currently established guidelines, which FMP codes are to be used with the following patient category codes? If more than one FMP code may be appropriate, please describe the criteria for choosing which one is correct.

K65	All contract workers (DYNA CORP, B&R, etc.) - 20
K78	Civilian in detention - 20
K91	Local national - 99
K92	Other emergency civilian - 98
K53	Federal civilian employee o/s - 20

20 - The prime beneficiary -- a person who derives his or her eligibility based on individual status rather than dependency on another person

98 - If the patient is -- a person brought to the MTF in an emergency

99 - If the patient is -- all others, not elsewhere classified.

Data Element: Last Name
Type: character
Length: 25

Definition: This is a free text field that should be completed using the person's identification card or obtained from interview with the patient if the patient has no identification card.

Data Element: First Name
Type: character
Length: 25

Definition: This is a free text field that should be completed using the person's identification card or obtained from interview with the patient if the patient has no identification card.

Data Element: Date of Birth
Type: Date/Time
Format: mmmddyyyy

Definition: The patient's date of birth. The date of birth is entered as: mmmddyyyy, where mmm is the three-character abbreviation of the month of the year, dd is the day of the month, and yyyy is the year. For example, JAN 17 2002 identifies January 17, 2002.

Data Element: Sex
Type: character
Length: 1

Definition: A one-character code that indicates the patient's gender as shown in the following table:

Code	Gender
F	Female
M	Male
Z	Unknown

Data Element: Inpatient/Outpatient
Type: bit
Length: 1

Definition: A code used to designate whether the episode of care was inpatient or outpatient as shown in the following table:

If episode of care is ...	Use this code ...
Inpatient	I
Outpatient	O

Administrative Data

Data Element: Patient Category
Type: Text
Length: 3

Definition: A two-part code used to indicate the beneficiary group to which an individual belongs. A beneficiary is an individual who has been determined to be eligible for benefits.

Code	Name
A	Army
N	Navy
M	Marine Corps
F	Air Force
C	Coast Guard
B	National Oceanic & Atmospheric Administration
P	Public Health Service
K	Not U.S. Uniformed Services
R	Reciprocal medical health care agreement

The first part is a one-character code (as listed above) that indicates the major category to which the beneficiary belongs. The second part is a two-digit code used to indicate a more detailed category.

A11 N11 M11 F11 C11 B11 P11	ACTIVE DUTY
A12 N12 M12 F12 C12 P12	Active Duty (Extended AD)
A13 N13 M13 F13 C13	Reserve
A14 N14 F14 C14	AD Recruit
A15 F15	Service Academy Cadet/Midshipman
	National Guard
A21 N21 F21 C21	MILITARY, NOT AD
A22 N22 M22 F22 C22 P22	Reserve Officer Training Corps (ROTC)
A23 F23	Reserve On Inactive Duty Training (IADT)
A24 N24 M24 F24 C24	National Guard On Inactive Duty Training
A25 N25 M25 F25 C25	Former Active Duty Transition Assistance Act
	Dependent of Former Active Duty Transition Act
A26 N26 M26 F26 C26	OTHER
A27 N27 M27 F27 C27	Applicant/Registrant
A28 N28 M28 F28 C28	Former Service Member-Maternity Care Only
A29 N29 M29 F29 C29 B29 P29	Newborns of Former Service Member
	Newborn of Dependent Daughters
A31 N31 M31 F31 C31 B31 P31	RETIREES
A32 N32 M32 F32 C32 B32 P32	Length of Service

NOTE: Retirees working for a contractor should be classified as K65, rather than *31.

Data Element: Pay Grade
 Type: Text
 Length: 2

Definition: A code used to indicate a person's monetary compensation based on his/her position in the military hierarchy.

Blanks are valid for a nonmilitary person.

Pay Grades

<u>Grade</u>	<u>Army</u>	<u>Marines</u>	<u>Navy</u>	<u>Air Force</u>
CD	Cadet	Cadet	Cadet	Cadet

O9	LTG	LTG	VADM	LTG
10	GEN	GEN	ADM	GEN
11	GA	GA	FADM	GenAF

Data Element: VIP
 Type: bit
 Length: 1

Definition: A code that indicates whether or not the patient is a VIP. A code of X indicates the patient belongs to VIP status. A blank is valid for all other types of patients that are not VIPs.

VIP patients include the following personnel:

- The President of the United States and family members
- The Vice President of the United States and family members

- Former Presidents of the United States and family members
- Cabinet members
- United States Supreme Court Justices
- members of the United States Congress
- Secretaries of Defense, Army, Navy, and Air Force
- Any former service secretary (authorized care as a retired soldier)
- Former Chairmen, Joint Chiefs of Staff and former Chiefs of Staff of Services
- Retired AMEDD general officers
- USAMEDCOM major subordinate commanders
- Foreign heads of states. Foreign dignitaries. Retired general or flag officers when place on SI/VSI roster or upon death in the MTF.
- Nationally known figures or celebrities and their family members who, in the opinion of the MTF commander, could be expected to be of particular interest to the Commanding General, USAMEDCOM or the news media.
- Any military member assigned to a USAMEDCOM activity upon notification of his/her death.

Data Element: Seriously III/Very Seriously III
 Type: character
 Length: 1

Definition: A one-character code that indicates of the seriousness of the patient's condition.

Code	Name
S	Seriously III
V	Very Seriously III

The Seriously III/Very Seriously III code is not needed for outpatients.

Data Element: Enabling Care
 Type: character
 Length: 30

Definition: Enabling Care identifies and tracks soldiers with categories of injuries and illnesses to include burns, amputations, spinal cord injuries, traumatic head injuries, traumatic eye injuries, and post traumatic stress disorders.

To complete the field for Enabling Care patients, enter an X on the datasheet in one or more of the following categories:

- Head Trauma
- Burns
- Post Traumatic Stress Disorder
- Eye Trauma
- Spinal Cord Injury
- Amputee (Land Mine, Grenade, Gunshot Wound, Motor Vehicle Accident, Explosion Other)

NOTE: If Amputee is specified, the cause of amputation must be specified also. For Amputees, specify one or more of the following: Land Mine, Grenade, Gunshot Wound (GSW), Motor Vehicle Accident (MVA), Explosion, or Other.

Data Element: VIP Title
Type: character
Length: 255

Definition: Identifying title belonging to the VIP patient; the formal appellation attached to a patient's name by virtue of office, rank, hereditary privilege, attainment, or as a mark of respect.

This is a free text field that should be completed using the person's identification card or obtained from interview with the patient if the patient has no identification card.

For example: Senator, Representative, President of U.S., Secretary of the Army, Major General, Prime Minister, U.S Supreme Court Justice, Prince, Grand Duchess, Ambassador, and others.

Data Element: VIP POC Name/Phone
Type: character
Length: 255

Definition: The person at the hospital or other medical facility who is the point of contact and/or responsible for releasing information concerning the patient's condition or medical status.

This is a free text field that should be completed using information designated at your facility.

Data Element: Register Number
Type: character
Length: 7

Definition: A number used to identify a hospital admission. The number is unique within the reporting medical treatment facility. The range is 0000001-9999999.

The Register Number does not apply to outpatients.

Data Element: Admission/Treatment Date
Type: Date/Time
Format: mmmddyyyy

Definition: The year, month, and day that a patient is admitted to or treated at the reporting medical treatment facility (MTF) or non-U.S. military facility.

The admission/treatment date is entered as: mmmddyyyy, where mmm is the three-character abbreviation of the month of the year, dd is the day of the month, and yyyy is the year. For example, JAN 17 2002 identifies January 17, 2002.

Absent sick cases (source of admission 3) must have this element completed with the date the patient was admitted to the civilian or other non-military facility. If the patient is transferred to an MTF after admission and discharge from the non-military facility, the admission to the MTF is treated as a separate admission of care with the admission date starting when the patient is admitted to the MTF.

Data Element: Diagnosis Text
Type: character
Length: 255

Definition: The diagnosis provided by the physician as the basis for treatment.

This is a free text field to be completed using diagnoses as described in the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM).

Data Element: Civilian Hospital Name
Type: character
Length: 255

Definition: The name of the civilian hospital that a patient was admitted to for care.

This is a free text field that should be completed using information from civilian hospitals providing care in the geographic area.

The Civilian Hospital Name does not apply to outpatients.

Data Element: Unit-Co
Type: character
Length: 5

Definition: The name of the Company to which the patient is assigned.

Data Element: Unit-Bn
Type: character
Length: 7

Definition: The name of the Battalion to which the patient is assigned.

Data Element: Unit-Bde
Type: character
Length: 7

Definition: The name of the Brigade to which the patient is assigned.

Data Element: Unit-Div
Type: character
Length: 12

Definition: The name of the Division to which the patient is assigned.

Data Element: Unit-Base
Type: character
Length: 5

Definition: The name of the Base to which the patient is assigned.

Data Element: Type Case
Type: character
Length: 3

Definition: An abbreviation that indicates the patient's reason for admission. Refer to the following table for valid values:

Abbreviation	Name
BC	Battle Casualty
DIS	Disease
INJ	Non-Battle Injury

Data Element: MOS
Type: character
Length: 4

Definition: The name of the military occupational skill the patient is assigned. Refer to the following table for valid values:

Code	Description

Data Element: Source of Admission
Type: character
Length: 1

Definition: A one-character code that indicates the type of admission to the reporting medical treatment facility. The following table identifies the valid codes:

Code	Name
0	Direct to reporting MTF from ER
1	Direct to reporting MTF from other than ER
3	Active Duty direct to non-U.S. Armed Services hospital, never moved to a military hospital (Total Absent sick, civilian hospital name must be input)
4	Initial admission to non-U.S. Armed Services hospital, transferred to military hospital (AD only)
5	Initial admission to non-U.S. Armed Services hospital, transferred to military hospital (non-AD only)
6	Transferred from U.S. Army hospital (MTF of Initial Admission and MTF Transferred From must be coded)
7	Transferred from U.S. Navy hospital (MTF of Initial Admission and MTF Transferred From must be coded)
8	Transferred from U.S. Air Force hospital (MTF of Initial Admission and MTF Transferred From must be coded)
L	Live Birth in this hospital
C	Carded for Record Only (CRO)

The Source of Admission does not apply to outpatients.

Element Name: Injury Date
Type: Date/Time
Format: mmmddyyyy

Definition: The year, month, and day that a patient was injured. The injury date is entered as: mmmddyyyy, where mmm is the three-character abbreviation of the month of the year, dd is the day of the month, and yyyy is the year. For example, JAN 17 2002 identifies January 17, 2002.

Element Name: Conv Lv Return Date
Type: Date/Time
Format: mmmddyyyy

Definition: The year, month, and day that a patient is expected to return from convalescent leave. The date is entered as: mmmddyyyy, where mmm is the three-character abbreviation of the month of the year, dd is the day of the month, and yyyy is the year. For example, JAN 17 2002 identifies January 17, 2002.

Data Element: Disposition Type
Type: character
Length: 2

Definition: An indicator of the patient's status upon departure from the hospital. Note that the Dispositions Codes for inpatients and outpatients are different. The codes for inpatients are shown below. The codes for outpatients are shown on page 18.

For **inpatients**, use one of the following values:

Active Duty Patients and Separations	
Code	Name
00	To medical hold
01	Returned to duty
02	To duty from TDRL (includes CRO)
03	To PDRL from TDRL (includes CRO)
04	AWOL (Dropped from Rolls)
10	Separation/Retired--PDRL (Including CRO)
11	Separation/Retired--TDRL (Including CRO)
12	Separation W/Severance pay (Including CRO)
13	Separation WO/Severance pay (Including CRO)
14	Non-disability separation for drug/alcohol abuse at or after transfer or referral to non-U.S. Armed Services MTF
15	Separation for failure to meet medical procurement standards (Including CRO)
51	CRO-Killed in action (KIA)
54	Convalescence Leave from Unit
55	Convalescence Leave from Hospital

Non-active Duty Patients	
Code	Name
05	Discharged Home
06	Left against medical advice (AMA)
26	Discharged to civilian acute care facility

27	Discharged to civilian skilled nursing facility or long-term psychiatric
28	Discharged to civilian residential intensive care treatment facility or substance abuse

Active Duty and Non-active Duty Patients	
Code	Name
21	Transferred to Army MTF
22	Transferred to Navy MTF
23	Transferred to Air Force MTF
24	Discharged to other federal facility (VA, IHS) excluding Army, Navy, Air Force MTF
30	Died during inpatient stay
41	CRO-Dead On Arrival (DOA)
42	CRO-Emergency Room (ER) Death
50	CRO-Other
	NOTE: Disposition code "50" used for selected conditions of medical, legal, or other significance for which inpatient treatment is not required.

For **outpatients**, use one of the following values:

Code	Name
1	Returned to duty
2	Released with work/duty limitations
3	Sick at home/quarters
4	Immediate referral
5	Left without being seen
6	Left against medical advice
7	Admitted
8	Expired

Data Element: Disposition Date
Type: Date/Time
Format: mmmddyyyy

Definition: The year, month, and day that a patient was dispositioned/discharged from the reporting medical treatment facility (or, for total absent sick cases, from the facility in which the patient was admitted).

The disposition date is entered as: mmmddyyyy, where mmm is the three-character abbreviation of the month of the year, dd is the day of the month, and yyyy is the year. For example, JAN 17 2002 identifies January 17, 2002.

The Disposition Date does not apply to outpatients.

Data Element: MTF Transferred To
Type: character
Length: 4

Definition: The DMIS ID that identifies the medical treatment facility the patient is being transferred to (Disposition Type is transfer) in order to continue this episode of care. For a list of DMIS IDs, see page 19.

Comments Data

Data Element: Comment Date
Type: Date/Time
Format: mmmddyyyy

Definition: The year, month, and day the comment is recorded on the patient record. The comment date is entered as: mmmddyyyy, where mmm is the three-character abbreviation of the month of the year, dd is the day of the month, and yyyy is the year. For example, JAN 17 2002 identifies January 17, 2002.

Data Element: Comments
Type: character
Length: As needed

Definition: Any comments needed to clarify the other data provided. This is a free-text field to include ancillary test as a result of an encounter, i.e. X-ray, lab, and/or immunization.

Reference: DMIS IDs

The following table lists the DMIS ID for each facility. Use the DMIS ID in the Facility field and the MTF Transferred To (MTF Trf To) field.

DMIS ID	Facility		Installation Name
	Type	DMIS Facility Name	
1217	HOSP	109th EVAC HOSP (TOE)	
1191	HOSP	10th MASH (TOE)	
1212	HOSP	114th EVAC HOSP (TOE)
